

EXTREME LEARNING WORKSHOP THE JAVA PERFORMANCE TUNING

June 14th - 17th, 2010
Prague, Czech Republic

In this **Extreme Learning Workshop**, you will learn a blend of tuning methodology, performance theory and practical tips on solving difficult performance problems. You will have an opportunity to hone your skills on a series of labs that are derived from real problems found during our consulting experience. The tools learned are all freely available or open source and will equip you to immediately apply what you have learned in your workplace.

No more suffering through slow, under performing applications. You will learn how to develop code with performance as the goal and the end user in mind.

The Objective of this **Extreme Learning Workshop** is to teach Java Performance Tuning:

- How to apply rigor to the task of performance tuning
- How to setup a performance tuning environment
- Importance of the user experience and benchmarking
- Tools needed to conduct a performance investigation
- Java memory and execution models

Seating is Limited, So Register Today:

Meet The Expert:

Kirk Pepperdine has been working in high performance and distributed computing for nearly 20 years. His focus has been on performance, working on architecting, developing, and tuning applications running on Cray and other high performance computing platforms. Kirk now specializes in Java, where he works in all aspects of performance and tuning in each phase of a project life cycle.

Kirk was recognized by Sun Microsystems as a 2006 Java Champion recipient for his contributions to the Java community.

What Others are Saying:

"The best course I ever attended: High knowledge of the trainer. Very helpful information, which could be used in real life. Exercises allowing to see the real life problems and the way how the problems should be solved – step by step. Introduction to open source/free tools which allow to monitor and diagnose quickly performance problems of the applications."

Rafel Azblocki, ING

When: June 14th - 17th, 2010

Where: Prague, Czech Republic

Price: 50.000,- CZK
